BOOK TRANSFER

(User – WHM)

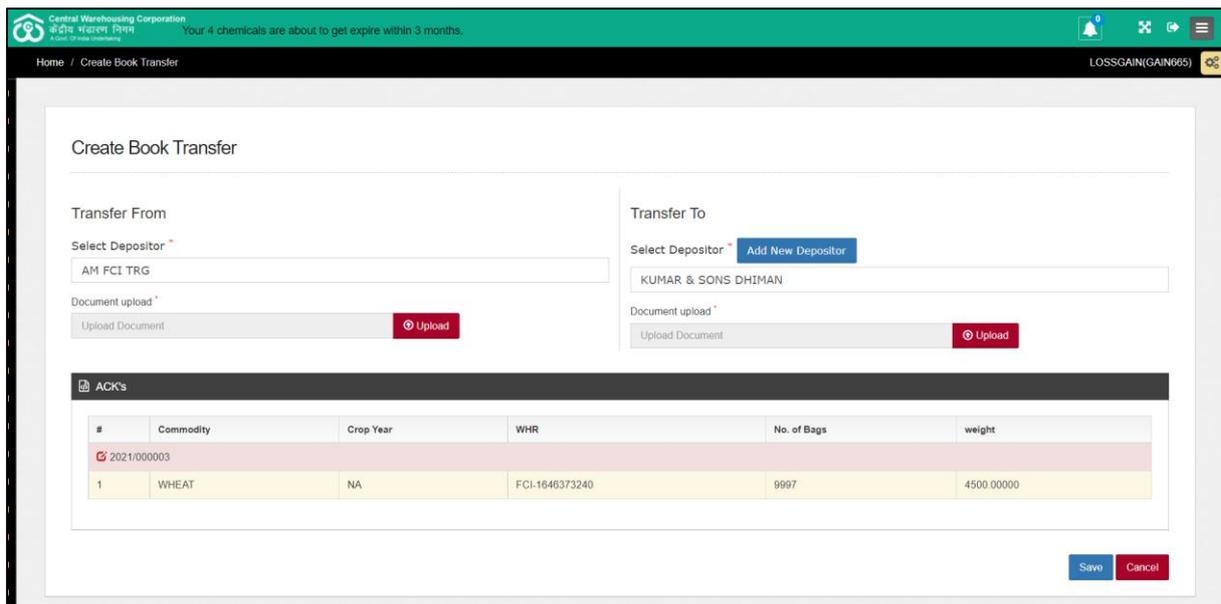

1. Create Book Transfer

- A. Warehouse personnel can create a request to transfer the ownership of a stock from one depositor to another depositor in WMS.
- B. To create a back-dated transaction request, the user will follow the below-mentioned steps:

Book Transfer >> Create Book Transfer

- C. The system will redirect the user to the above screen where the WHM can view the list of any book transfer requests created over time or create a new request by clicking on the ‘Create Book Transfer’ button.

- D. The system will redirect the user to the above screen where the user will enter the required details like:

- a. Transfer from
 - i. Depositor name
 - ii. Approval Document
- b. Transfer to
 - i. Depositor Name
 - ii. Approval Document

Note: The system will display the list of all the ACKs of the depositor whose stock is being transferred. This list is for information only.

E. Clicking on the ‘Save’ button will create the book transfer request in WMS.

2. Generate DO

A. Once the request is created in WMS, the warehouse manager will first create a delivery order for the stock being transferred. To reach the DO screen, the user will follow the below-mentioned steps:

Book Transfer >> Generate DO

B. The system will redirect the user to the above screen where the user can

search for the stock being transferred by entering details like:

- a. Book Transfer number
- b. Commodity
- c. Variety
- d. Reservation type

C. The user can click on the ‘search’ button to open the appropriate selection screen and select the following information:

- a. Compartment number
- b. Stack number
- c. WHR/ACK Number
- d. Delivery package/Units/Bags or LOT
- e. The user will have the provision to add a new row by clicking on the Plus button provided.

Note: The user can select multiple ACKs for book transfer. In such cases against each ACK being transferred, the WHM will create a new ACK.

- f. Transfer book type
 - i. Reservation: If the user selects Reservation, then he will have to select the reservation request number against which they want to keep the stock.

Total Delivery Packages/Units/Bags or Lots: 2900	Transfer Book Type : * Reservation Basis	Reservation Request : * Select request
---	---	---

ii. General

g. Is shifting Required?

- i. If the user selected “Yes,” he will select if the stock will move via truck or without a truck.
- ii. If the user selects “No,” then the stock will not be transferred to another stack, the system will auto-update the stack formation under the new depositor’s name.

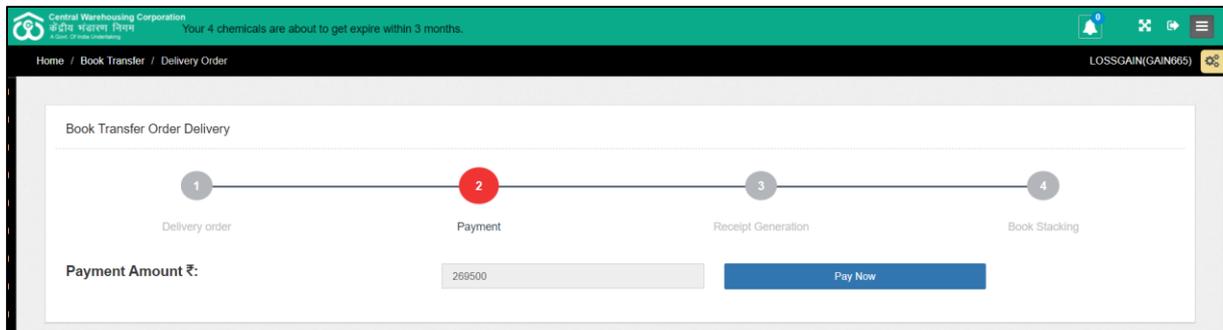

Note: The shifting is not required only if the complete stock of the stack is being transferred. Shifting is always required in case of partial transfer.

D. The system will display the outstanding amount to be paid by the user for the stock being transferred. The user must pay the outstanding amount before continuing with the process.

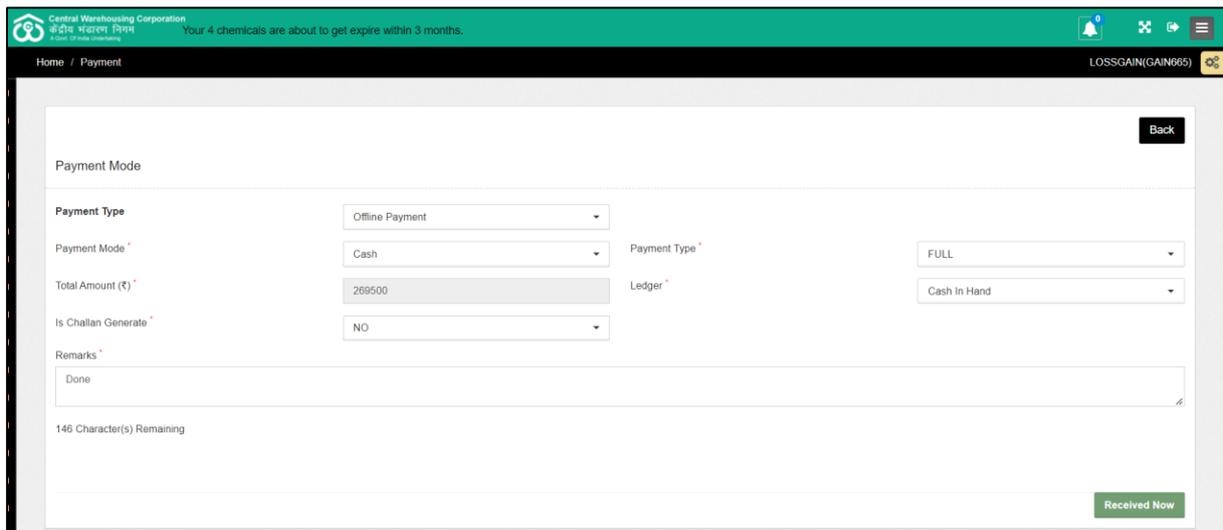

Note: 1. The system will provide a credit facility to the government depositors as per the laid down process.

2. In the case of Reservation/General Monthly bill ACKs, the payment for the delivery order is not mandatory.

E. Clicking on the “Save” button, the system will redirect the user to the payment screen where the user will make a payment before proceeding ahead.

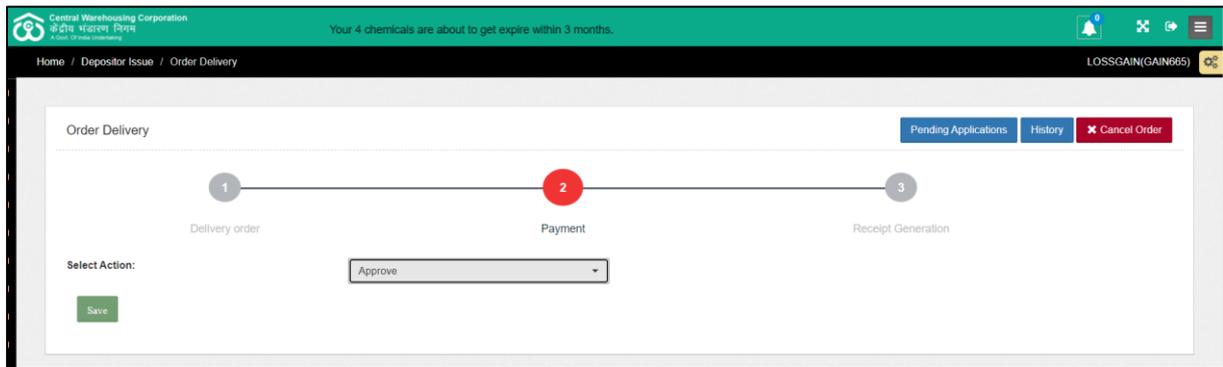

F. Clicking on the “Pay now” button will redirect the user to the below screen to record the payment details.

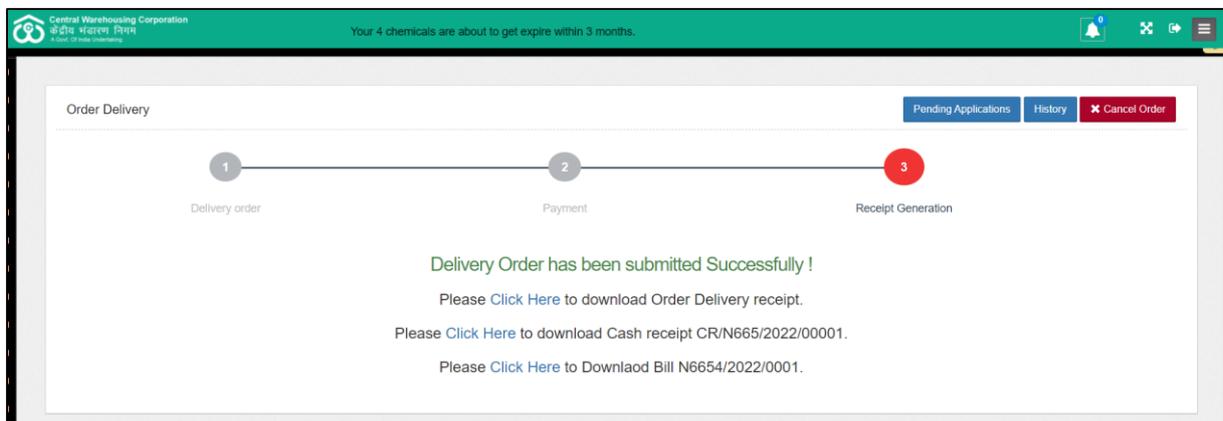

G. The user will select the following information on the screen:

- a. Payment type
- b. Payment Mode
- c. Is challan generated?
 - i. Yes
 - ii. No
- d. Remarks

H. Clicking on the “Receive Now” button will complete the payment receipt process and redirect the user to the below-provided screen.

The user will select the payment status and click on the Save button. This will redirect the user to the below screen and will mark the DO as approved.

- I. Once done, the user will continue ahead based on the shifting type selected while creating the Delivery Order.

Re-Stacking Required Without Truck

3. Book Stacking

- A. Once the DO is completed, the user will access the book stacking screen to enter the stacking details of the stock being shifted. To reach the Book stacking screen, the user will follow the below-mentioned steps:

Book Transfer >> Generate DO

- B. The system will redirect the user to the above-provided screen where the user will search for the appropriate entry by selecting the Book transfer number and Delivery order number.
- C. Clicking on the search button will display the stacking screen where the user will enter/select the following information to complete the stacking process.
- Godown number
 - Compartment number
 - Stack type
 - Main stack number
 - Bags/units
 - Users will also have the provision to add a new row by clicking on the 'Add more' button and entering another stack details where they want to stack the rest of the bags.
- D. Clicking on the submit button will save the details entered in WMS.

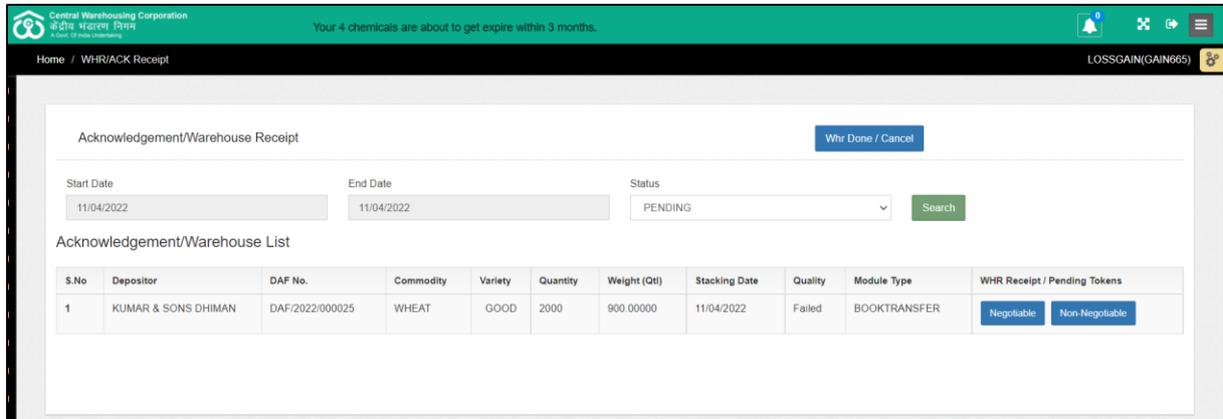

4. Create ACK

- A. Once the stacking is done, the user will generate ACK for the transferred stock under the new owner's name from the ACK/WHR Screen. The ACK serves as a proof of stock submission and is provided to the respective depositor.
- B. *Note: In case the user transferred stock from multiple ACKs, then multiple new ACKs will be generated under the transferee's name.*

C. To reach this screen, the user will perform the below-mentioned steps:

Receipt of Stock >> Reservation Basis >> ACK/WHR

D. This will redirect the user to the WHR/ACK list screen where the user can search for the ACKs pending generation. The user will select the Start Date and End date to narrow down the search.

E. On this screen, the user can perform the following functions:

a. Generate ACK/Negotiable WHR/ Non-negotiable WHR

- i.** To generate the respective acknowledgement document, the user can click on one of the provided buttons, i.e., ACK, Negotiable, and Non-Negotiable.

Re-Stacking Required with Truck

6. Gate-In

A. After DO is submitted successfully, the token will show up at the gate-in screen. To reach here users can follow the below-mentioned steps.

Book Transfer >> Truck Process >> Gate-In

The screenshot shows a 'Gate-In' process flow with four steps: 1. Gate In (highlighted in red), 2. Stack Out, 3. Stacking, and 4. Gate out. Below the flow is a table showing two items:

S.No.	Depositor Name	Depositor Account No.	Book Transfer No.	Commodity	Variety	Action
1	AM FCI TRG	ACC/2020/012734	BT/110422/0002	WHEAT	GOOD	Next
2	KUMAR & SONS DHIMAN	ACC/2021/013387	BT/110422/0003	WHEAT	GOOD	Next

B. The user can click on the next button to proceed ahead with the gate-in process.

The screenshot shows the 'Gate In' form with the following fields:

- Depositor Name*: AM FCI TRG
- Gate In Date*: 11/04/2022
- Gate In Time*: 5:15 PM
- Gate In Number*: Gate No. 1
- Vehicle No*: pb10eu2374
- Driver Name*: suresh
- Is Weighment Required*: NO

Buttons: Save, Cancel, Gate In History, Back.

C. The user will enter the requested details in the fields provided.

Note: All the fields with an '*' sign are mandatory.

D. Once filled, the user can click on the save button and proceed to the next step.

E. The user can also click on the 'Gate History' button to view the list of gate-ins for that day.

Issue Gate In History

11/04/2022 TO 12/04/2022

Showing 1-2 of 2 items.

#	Depositor Name	Token Number	Gatepass Number	Vehicle Number	In Date	In Time	Actions
1	Kumar & Sons Dhiman	110422/BT-11-Apr/0001	OX2698393	BT-11-Apr	11/04/2022	12:25:29	
2	Am Fci Trg	110422/pb10eu2374/0003	PR7380033	pb10eu2374	11/04/2022	2:50 PM	

F. The user can also perform a search by selecting the date range for which they want to view the gate history.

G. Clicking on the ‘Issue gate-in’ button will redirect the user to the Gate-in Screen.

7. Stack Out

A. After gate-in, the token will show up on the Stack out screen.

Stack Out

1 Gate In — 2 Stack Out — 3 Stacking — 4 Gate out

Select Main Token

Depositor Details

WHR Number *	Compartment *	Stack Number *	Balance Packages/Units/Bags or Lots *	Requested Packages/Units/Bags or Lots *
<input type="text" value="FCI-1646373240"/>	<input type="text" value="1B"/>	<input type="text" value="1B-1"/>	<input type="text" value="2900"/>	<input type="text" value="2900"/>

B. The user will select the respective token from the dropdown and click on the search button. (The token number sequence is: DDMMYY/Truck number/0001)

C. Once done, the stack out fields will pop for the selected token. The user will enter the required details, i.e.,

a. Requested Packages/Units/bags or Lots

D. Once the appropriate information is fed into the form, the user will click on the submit button and proceed to the next step.

8. Stacking

A. After stack-out, the token will show up on the Stacking screen.

The screenshot displays the 'Book Transfer Stack Details' form. At the top, there is a progress bar with four steps: 1. Gate In, 2. Stack Out, 3. Stacking (highlighted in red), and 4. Gate out. Below the progress bar, the form contains the following fields and values:

- Token No.: 110422/pb10eu2374/0003(S1) (with a search button)
- Depositor Name: KUMAR & SONS DHIMAN
- Commodity: WHEAT
- Variety: GOOD
- No. Of Units: 2900
- Crop Year: NA
- Date: 11-04-2022
- Total Bags: 2900
- Godown No.: 1
- Compartment No.: 1A
- Stack type: Full Stack
- Main Stack No.: 1A-8
- Bags/Units: 2900

Buttons include 'Search', 'Add More', and 'Submit'.

B. The user will select the respective token from the dropdown and click on the search button. (The token number sequence is: DDMMYY/Truck number/0001)

C. Once done, the stacking fields will pop for the selected token.

D. The user will then enter/select the required information in the form provided to perform the stacking.

Note: The stack detail form will only come if there is a stack-allocated for the respective commodity and depositor. If not, the system will ask the user to allocate space.

E. The user can stack the commodity into multiple stacks, if required, by clicking on the 'Add more' button.

F. Once done, the user will submit the details entered and proceed with the next step.

9. Gate-Out

A. After Stacking, the token will show up on the Gate-out screen.
